AMERICA'S FINEST GLASS IN **color**

A New Color - A New Pattern

We expect 1959 to be another record year for Fenton.

The new color, Topaz Opalescent, (the antique trade calls it Vaseline), is a beautiful blend of yellow and green fluorescence which just can't be reproduced on paper. When you see it at the shows or in our sales offices, we're sure you'll agree it's THE color for '59.

The new pattern is "Cactus", one of the most appealing designs ever created at Greentown, Indiana. We've picked the best from the past, added some of our own to make it more salable in today's market, and put it in Topaz Opalescent and the ever-popular Milk Glass.

The items illustrated here along with the rest of the top-selling Fenton line will make your sales even better.
