

F E N T O N

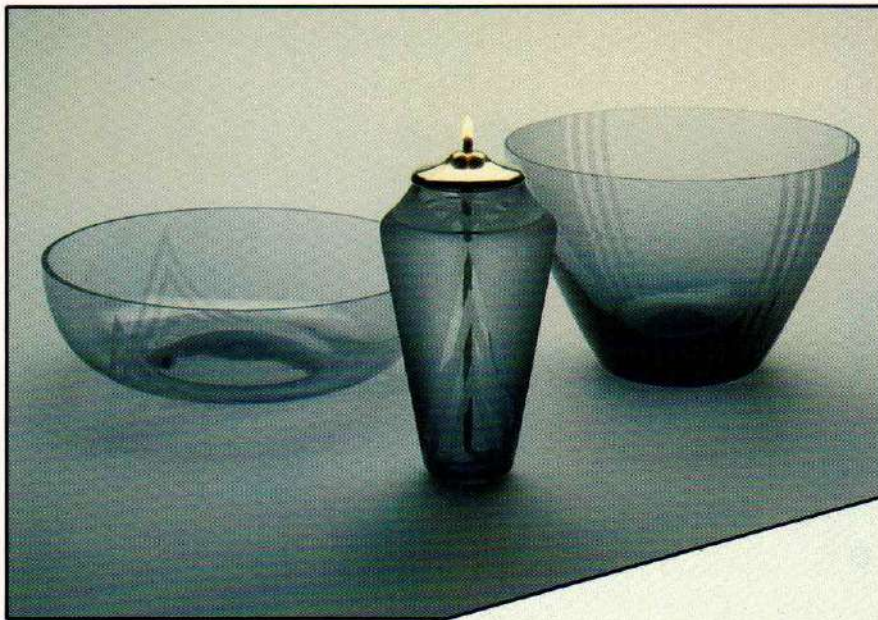

*Artisan*

Function, Form and Style—Fenton has put it all together. The Geometrics Collection strikes the right chord in a fashion conscious society. Simple, yet dramatic, the sleek designs and high quality lend a prestigious appeal for your most discriminating customers.

Fenton has added three new items to the very successful Geometrics Collection. The sparkling clarity of the clear glass is highlighted by the satin finished etching on each piece. The bowls and oil candle were designed for function—yet each makes a strong statement in tasteful elegance.
