Where Glassmaking Comes to Life

Off hand creations hold a special place in the hearts of many Fenton collectors...especially Dave Fetty Originals!

The phrase "off hand" really means working "by hand," as the glass artisans create various effects by shaping molten glass and applying threads or bits of glass in contrasting colors.

Dave may use a mould to bring the piece to its final shape, but all the decorative effects—colored frit, hanging hearts, pulled feathers, handles, ringing, threading, etc. are done strictly by hand.

As we celebrate our 100th year of glassmaking...we hope you enjoy your Dave Fetty Original!
