FENTON

2007

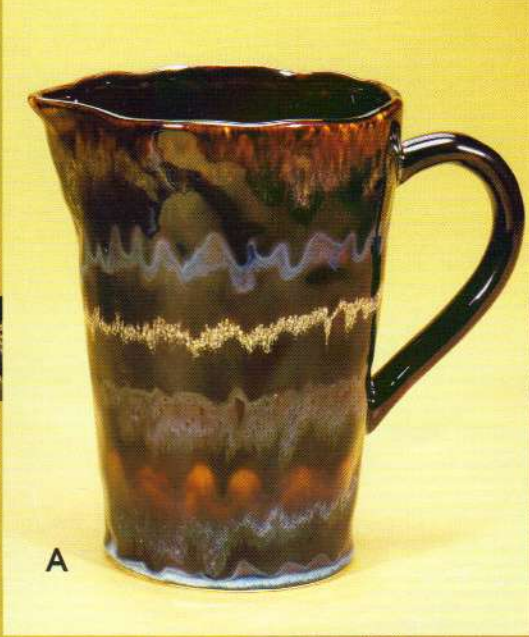

FireWorks

Like colorful minerals drawn from the earth, this handmade collection glows with natural beauty. Three firings through a kiln are required to achieve the artistic blend of color. Reactive glazing separates the paint colors into droplets of texture while the final glaze ensures food safety in use.

As in all fine handmade ceramics each piece will vary in color and texture due to the reactive glazing process. Made of high quality stoneware, the collection is food safe, oven safe and dishwasher durable. Imported.

Fenton glass colors of Autumn Gold, Aubergine and Indigo Blue are the perfect complement to these luscious mineral tones. Patterned swirls are thick with texture on the bowl, candy box and candle plate. Vases are swung freely to create a free form finish. All of the glass is artfully handmade in the U.S.A.
